Index to Journal of Applied Mechanics

Volume 20, 1953

The JOURNAL OF APPLIED MECHANICS includes papers contributed to the Transactions of the ASME by the Applied Mechanics Division of the ASME. The JOURNAL OF APPLIED MECHANICS for 1953 was issued quarterly in March, June, September, and December. (AC) denotes author's closure; (BR) book reviews; (D) discussion of a paper.

JOURNAL OF APPLIED MECHANICS

March	1–156
June	157–316
September	317–452
December	453–596

A

ACKERMANN, W. O.
Symmetric turbulent mixing of two parallel streams 63, 445

AERODYNAMICS. *See* JET PROPULSION

ALUMINUM
Dynamic stress-strain relations for annealed 28 aluminum under compression impact 523
Effect of range of stress on fatigue of 76S-T61 aluminum alloy under combined stresses which produce yielding 365

ALVES, G. E.
Study of vanes singing in water (D) 301

ANALOGY. *See* ELECTRIC ANALOGY, HYDRAULIC ANALOGY

ANDERSON, R. A.
Flexural vibrations in uniform beams according to the Timoshenko theory 504

APPLIED MECHANICS
Anniversary volume on applied mechanics; dedicated to C. B. Biezeno (BR) 452

ARONOFSKY, J. S.
Unsteady radial flow of gas through porous media 210, 583

B

BAER, D. H.
Temperature distribution in the wake of a heated sphere 407

BAKER, E. G.
Matrix method for flexibility analysis of piping systems (D) 295

BARKER, D. H.
Study of vanes singing in water (D) 301

BARS. *See also* STRUCTURES
Necking and rupture of rods subjected to constant tensile loads 105

BEAMS. *See also* RINGS, STRUCTURES
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action (D) 150
Analog solution for beams excited by an arbitrary force 482
Deflection and stresses in beams subjected to bending and creep (D) 310
Deflections of circular beams resting on elastic foundations obtained by methods of harmonic analysis 227
Dynamic load characteristics in plastic bending of beams 475
Flexural vibrations in uniform beams according to the Timoshenko theory 504
Flexural wave solutions of coupled equations representing the more exact theory of bending 511
Forced lateral vibration of beams on damped flexible end supports 167
Free vibrations of constrained beams (D) 310
Graphical-numerical solution of problems of Saint-Venant torsion and bending 321
Improved electrical analogy for the analysis of beams in bending 349
Influence coefficients of tapered cantilever beams computed on SEAC ..... 131, (D) 442
Large plastic deformations of beams under transverse impact (D) 151
Natural frequencies of twisted cantilever beams 241
Nonlinear distribution of bending stresses due to distortion of the cross section ..... 95, (D) 438
Note on the maximum effect of a moving force on a simple beam 562

BEAMS (*continued*)
Note on torsional oscillation of I-type beams 567
Numerical analysis of forced vibrations of beams 53
Rails on elastic foundations under the influence of high-speed traveling loads 13
Reinforced circular holes in bending with shear 279
Stresses in curved beams—a tabular method of solution based on Winkler's theory ..... 138, (D) 444
Transverse impact on beams and plates 461
Vibration of rotating, tapered-twisted beams 381

BEARINGS
Electrical method for determining journal-bearing characteristics (D) 440
Note on oil whip 450

BERRY, V. J.
Temperature distribution in the wake of a heated sphere 407

BINDER, R. C.
Two-dimensional flow through a diffuser with an exit length 390

BITTER, FRANCIS
Introduction to solid state physics (BR) 596

BLACK, W. E.
Stresses in curved beams—a tabular method of solution based on Winkler's theory (D) 444

BLADES. *See* TURBINES

BLEICH, H. H.
Nonlinear distribution of bending stresses due to distortion of the cross section 95, 439
Response of an elastic cylindrical shell to a transverse, step shock wave 189, 589
Strain-energy expression for thin cylindrical shells 448

BOILING
Rate of growth of vapor bubbles in superheated water 537

BOLEY, B. A.
Graphical-numerical solution of problems of Saint-Venant torsion and bending 321

BOOK REVIEWS
Advanced mechanics of materials 314
Advanced strength of materials 314
Aerodynamics of propulsion 312
Anniversary volume on applied mechanics; dedicated to C. B. Biezeno 452
British engine report; new series, vol. 1, Nov., 1952 451
Fatigue and fracture of metals 316
Foundation engineering 451
Heat and thermodynamics 154
Instrument engineering. Volume 1. Methods for describing the situation of instrument engineering 155
Introduction to heat transfer 315
Introduction to solid state physics 596
Mechanics—Lectures on theoretical physics, vol. 1 595
Mechanik, vol. 3, Dynamik der Systeme 154
Nature of some of our physical concepts 312

BOOK REVIEWS (*continued*)
Nonlinear vibrations in mechanical and electrical systems 154
Rise of the new physics 313
Science of flames and furnaces 155
Servomechanism analysis 315
Statistical tables and formulas 452
Statistical theory with engineering applications 452
Superconductivity 596
Supersonic flow and shock waves 156
Theory of elasticity and plasticity 595
Theory of homogeneous turbulence 451
Writing the technical report 156

BORESI, A. P.
Damping constants and stress distribution in resonance response (D) 593

BROCK, J. E.
Matrix method for flexibility analysis of piping systems (AC) 296

BROWN, W. B.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part I (D) 148

BUCKLING
Buckling of multiple-bay ring-reinforced cylindrical shells subject to hydrostatic pressure 469
Nondestructive differential-pressure test for thin shells ..... 48, (D) 587

BURNETT, H. R.
Symmetric turbulent mixing of two parallel streams 63, 445

C

CAIN, B. S.
Mathematical analysis of the relaxation type of vehicle suspension (D) 143

CAMPBELL, J. D.
Elastic waves created during tensile fracture (D) 583

CARREKER, R. P., JR.
Correlation of creep properties by a diffusion analogy (D) 146

CAVITATION
Rate of growth of vapor bubbles in superheated water 537

CEMENTED JOINTS
Determination of stresses in cemented lap joints 355

CHENEA, P. F.
On the application of the impedance method to continuous systems 233

CHESKY, K. P.
Influence of viscous effects on impact tubes 253, 583

CHILTON, E. G.
Elastic waves created during tensile fracture (D) 584

CHRISTIANO, J. G.
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action (AC) 150

CLARK, D. S.
Dynamic stress-strain relations for annealed 28 aluminum under compression impact 523

COCHARDT, A. W.
Origin of damping in high-strength ferromagnetic alloys 196, 575

COLE, J. D.
Constant-strain waves in strings 519

COMBUSTION
Science of flames and furnaces (BR) 155
Water-channel analog to high-velocity combustion ..... 115, (D) 439

COMPRESSORS
On asymmetric flow in an axial-flow compressor stage ..... 57, (D) 442

CONTACTS
Temperature development in a heated contact with application to sliding contacts (D) 147

CONWAY, H. D.
Bending of a uniformly loaded rectangular plate with two adjacent edges clamped and others either simply supported or free (AC) 304
Closed-form solutions for plates of variable thickness 564
Some problems of orthotropic plane stress 72, 446
Stress distributions induced by concentrated loads acting in isotropic and orthotropic half planes 82, 446

CORNELL, R. W.
Determination of stresses in cemented lap joints 355

CRAGGS, J. W.
Shearing of a rectangular block between rough plates 270

CRAWFORD, LYNDON
Nonlinear distribution of bending stresses (D) 438

CREEP OF MATERIALS. *See also* METAL CREEP
Analytical theory of the creep deformation of materials 245
Deflection and stresses in beams subjected to bending and creep (D) 310

CRINER, H. E.
Rails on elastic foundations under the influence of high-speed traveling loads 13

CROCCO, LUIGI
Investigation of annular liquid flow with concurrent air flow in horizontal tubes (D) 311

CROSSLEY, F. R. E.
Comments on the free oscillation of the centrifugal pendulum with wide angles (AC) 142
Forced oscillation of the centrifugal pendulum with wide angles 41

CRYSTALLOGRAPHY
Introduction to solid state physics (B) 596

CYLINDERS
New approach to shell theory: circular cylinders ..... 33, (D) 439
On the maximum numerical value of the tangential stress in thick-walled cylinders 134
Solutions of heat-conduction problem with the aid of the inverse method 489

D

DAHL, N. C.
Toroidal-shell expansion joints 497

DAMPING. *See* VIBRATION

DEFORMATION
Analytical theory of the creep deformation of materials 245
Application of limit analysis to punch-indentation problems 453
Dynamic load characteristics in plastic bending of beams 475

DEN HARTOG, J. P.
Anniversary volume on applied mechanics; dedicated to C. B. Biezeno (BR) 452
Nonlinear vibrations in mechanical and electrical systems (BR) 154

DERESIEWICZ, H.
Elastic spheres in contact under varying oblique forces 327

DERGARABEDIAN, PAUL
Rate of growth of vapor bubbles in superheated water 537

DESIGN DATA AND METHODS
Design of helical and leaf springs for minimum weight 435
On the maximum numerical value of the tangential stress in thick-walled cylinders 134
Stresses in curved beams—a tabular method of solution based on Winkler's theory ..... 138, (D) 444

DETONATION. *See* COMBUSTION

DIETZ, ALBERT G. H.
Foundation engineering (BR) 451

DIFFUSERS. *See* FLOW OF FLUIDS

DIMAGGIO, F.
Strain-energy expression for thin cylindrical shells 448

DOLAN, T. J.
Fatigue and fracture of metals (BR) 316

DOUGHERTY, C. B.
Constant-strain waves in strings 519

DRUCKER, D. C.
Application of limit analysis to punch-indentation problems 453

DRYDEN, HUGH L.
Aerodynamics of propulsion (BR) 312

DUBINBERRE, G. M.
Temperature development in a heated contact with application to sliding contacts (D) 147

DYNAMICS. *See also* GYROSCOPES
Mechanik, vol. 3, Dynamik der Systeme (BR) 154

E

EICHMANN, E. S.
Note on the maximum effect of a moving force on a simple beam 562

ELASTICITY. *See also* STRESSES AND STRAINS
Buckling of multiple-bay ring-reinforced cylindrical shells subject to hydrostatic pressure 469
Elastic sphere under concentrated loads (D) 304
Elastic spheres in contact under varying oblique forces 327
Stability of thin elastic plates covering an arbitrary simply connected region and subject to any admissible boundary conditions ..... 23, (D) 591
Theory of elasticity and plasticity (BR) 595

ELECTRIC ANALOGY
Analog solution for beams excited by an arbitrary force 482
Elastic waves created during tensile fracture; the phenomenon of a second fracture ..... 122, (D) 583
Electrical method for determining journal-bearing characteristics (D) 440
Improved electrical analogy for the analysis of beams in bending 349
Measurement of acceleration pulses with the multifrequency reed gage 422
Rails on elastic foundations under the influence of high-speed traveling loads 13
Resistor-network solution for the torsion of hollow sections 562
Temperature distribution in the wake of a heated sphere 407

ELECTRICAL CONDUCTIVITY
Superconductivity (BR) 596

ENGEL, H. L.
Measurements of torsional stiffness changes and instability due to tension, compression, and bending 553

ENGINE FAILURES
British engine report (BR) 451

ERINGEN, A. C.
Transverse impact on beams and plates 461

EXPANSION JOINTS. *See* PIPE JOINTS

F

FEIGEN, MORRIS
Minimum weight of tapered round thin-walled columns (AC) 143

FINDLEY, W. N.
Effect of range of stress on fatigue of 76S-T61 aluminum alloy under combined stresses which produce yielding 365

FLAMES AND FLAME PROPAGATION. *See* COMBUSTION

FLETCHER, H. J.
Thin rectangular plates on elastic foundations (AC) 299

FLOW OF FLUIDS
Analysis of viscous laminar incompressible flow through axial-flow turbomachines with infinitesimal blade spacing 401
Axisymmetric flow of an ideal incompressible fluid about a solid torus 393
Influence of viscous effects on impact tubes ..... 253, (D) 582
Investigation of annular liquid flow with concurrent air flow in horizontal tubes (D) 311
Note on mass flow 565
On asymmetric flow in an axial-flow compressor stage ..... 57, (D) 442
On turbulent flow between parallel plates ..... 109, (D) 445

FLOW OF FLUIDS (*continued*)
Skin friction and heat transfer for laminar boundary-layer flow with variable properties and variable free-stream velocity 415
Symmetric turbulent mixing of two parallel streams ..... 63, (D) 445
Theory of homogeneous turbulence (BR) 451
Two-dimensional flow through a diffuser with an exit length 390
Unsteady radial flow of gas through porous media ..... 210, (D) 583

FLUID DYNAMICS
Study of vanes singing in water (D) 301

FLUID METERS
Influence of viscous effects on impact tubes ..... 253, (D) 582

FOUNDATIONS. *See also* STRUCTURES
Foundation engineering (BR) 451

FRACTURE. *See* METAL FATIGUE, METAL TESTING

FRICTION
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part 1 (D) 148
Skin friction and heat transfer for laminar boundary-layer flow with variable properties and variable free-stream velocity 415
Temperature development in a heated contact with application to sliding contacts (D) 147

FROCHT, M. M.
Elastic sphere under concentrated loads (D) 304

FUCHS, H. O.
Mathematical analysis of the relaxation type of vehicle suspension (D) 144

G

GAGES. *See also* INSTRUMENTS—VIBRATION

GALLAGHER, JOSEPH
Additional data on the relaxation type of vehicle suspension 567
Mathematical analysis of the relaxation type of vehicle suspension (AC) 145

GALLE, K. R.
Two-dimensional flow through a diffuser with an exit length 390

GASES. *See* FLOW OF FLUIDS, NATURAL GAS

GAZLEY, CARL, JR.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part 1 (D) 148

GERARD, GEORGE
Elastic waves created during tensile fracture (D) 584

GOLDBERG, J. E.
Axisymmetric flexural temperature stresses in circular plates 257, 575
Note on torsional oscillation of I-type beams 567

GOLDSMITH, WERNER
On longitudinal plane waves of elastic-plastic strain in solids (D) 307

GONGWER, C. A.
Study of vanes singing in water (AC) 301

GOODIER, J. N.
Concentrated radial loads on flat curved beams 568
Measurements of torsional stiffness changes and instability due to tension, compression, and bending 553
Mechanik, vol. 3, Dynamik der Systeme (BR) 154
Theory of elasticity and plasticity (BR) 595

GORTON, R. E.
Comments on the free oscillation of the centrifugal pendulum with wide angles (D) 142

GRAPHICAL METHODS
Graphical-numerical solution of problems of Saint-Venant torsion and bending 321
On a general method of solving second-order differential equations by phase-plane displacements (D) 301

GRAPHITE
High-temperature compression testing of graphite 289

GREEN, A. E.
Some problems of orthotropic plane stress (D) 446
Stress distributions induced by concentrated loads acting in isotropic and orthotropic half planes (D) 446

GREEN, LEON, JR.
Correlation of creep properties by a diffusion analogy (AC) 147
High-temperature compression testing of graphite 289

GROSSMAN, NICHOLAS
Advanced mechanics of materials (BR) . . 314
GYROSCOPES
Topics in gyroscopic motion . . . . . 1 (D) 589

H

HALL, F. C.
Analysis of viscous laminar incompressible flow through axial-flow turbomachines with infinitesimal blade spacing 401
HEAT TRANSFER. *See also* THERMAL STRESSES
Introduction to heat transfer (BR) 315
Skin friction and heat transfer for laminar boundary-layer flow with variable properties and variable free-stream velocity 415
Solutions of heat-conduction problem with the aid of the inverse method 489
Temperature development in a heated contact with application to sliding contacts (D) 147
Temperature distribution in the wake of a heated sphere 407
HEISLER, M. P.
Transient thermal stresses in slabs and circular pressure vessels 261
HELLER, S. R., JR.
Reinforced circular holes in bending with shear 279
HETENYI, M.
Advanced strength of materials (BR) 314
HIGH-TEMPERATURE MATERIALS
High-temperature compression testing of graphite 289
HILTON, H. H.
Analysis of viscous laminar incompressible flow through axial-flow turbomachines with infinitesimal blade spacing . 401
HOATH, P. T.
Matrix method for flexibility analysis of piping systems (D) 296
HODGE, P. G., JR.
Effect of strain hardening in an annular slab 530
On the plastic strains in slabs with cutouts 183
HOERL, A. E.
Statistical tables and formulas (BR) 452
Statistical theory with engineering applications (BR) 452
HOFF, N. J.
Elastic sphere under concentrated loads (D) 305
Necking and rupture of rods subjected to constant tensile loads 105
HOFFMAN, D.
Plastic-flow in a V-notched bar pulled in tension (D) 152
HOLL, D. L.
Thin rectangular plates on elastic foundations (D) 298
HOLM, R.
Temperature development in a heated contact with application to sliding contacts (AC) 148
HORVAY, G.
End problem of rectangular strips 87, 579
HRONES, JOHN A.
Servomechanism analysis (BR) 315
HUANG, M. K.
Bending of a uniformly loaded rectangular plate with two adjacent edges clamped and others either simply supported or free (AC) 304
HUDSON, D. E.
Measurement of acceleration pulses with the multifrequency reed gage 422
HURD, C. W.
Influence of viscous effects on impact tubes 253, 583
HUTH, J. H.
Complex-variable approach to stress singularities 561
Constant-strain waves in strings 519
HYDRAULIC ANALOGY
Water-channel analog to high-velocity combustion . . . . . 115, (D) 139
HYDROSTATIC TESTING
Buckling of multiple-bay ring-reinforced cylindrical shells subject to hydrostatic pressure 569

I

IMPACT
Experimental study of the propagation of transient longitudinal deformations in elastoplastic media 427
Transverse impact on beams and plates . . . 461
IMPACT TUBES. *See* FLUID METERS
IMPEDANCE METHOD. *See* VIBRATION
INDENTATION. *See* DEFORMATION
INDUSTRIAL FURNACES
Science of flames and furnaces (BR) 155
INSTRUMENTS
Instrument engineering. Volume 1, Methods for describing the situation of instrument engineering (BR) 155
INSTRUMENTS—VIBRATION
Experimental study of the propagation of transient longitudinal deformations in elastoplastic media 427
Measurement of acceleration pulses with the multifrequency reed gage 422
IRWIN, G. R.
Angle and strain relations in flat-plate Lüders' bands 449

J

JACOBSEN, L. S.
On a general method of solving second-order differential equations by phase-plane displacements (AC) 303
JARRETT, G. W.
Vibration of rotating, tapered-twisted beams 381
JENKINS, R.
Unsteady radial flow of gas through porous media 210, 583
JENNINGS, F. B.
Topics in gyroscopic motion (D) 589
JERRARD, R. P.
Calculation of elastic displacements from photoelastic curves 375
JET PROPULSION
Aerodynamics of propulsion (BR) 312
JOHNSON, J. E.
Dynamic stress-strain relations for annealed 28 aluminum under compression impact 523
JOINTS. *See* CEMENTED JOINTS, PIPE JOINTS
JUNGER, M. C.
Response of a cylindrical shell to a shock wave (D) 589

K

KAYE, JOSEPH
Heat and thermodynamics (BR) 154
Introduction to heat transfer (BR) 315
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part I (AC) 149
KEENAN, J. H.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part I (AC) 149
Nature of some of our physical concepts (BR) 312
KENNARD, E. H.
New approach to shell theory: circular cylinders 33, 439
KENNEDY, E. C.
Note on mass flow 565
KETCHUM, G. M.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part I (AC) 149
KINETICS. *See* GYROSCOPES
KLINGENSMITH, K. K.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. Part I (AC) 149
KLOTTER, K.
Comprehensive stability criterion for forced vibrations in nonlinear systems . . 9
Mathematical analysis of the relaxation type of vehicle suspension (D) 144
On an iterative method for nonlinear vibrations (D) 590
KOEGLER, R. K.
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action (D) 150
KREYWOBLOCKI, M. Z. v.
End problem of rectangular strips (D) 576
Stability of thin elastic plates (D) 591
KUETHE, A. M.
On turbulent flow between parallel plates (D) 445

L

LAITONE, E. V.
Water-channel analogue to high-velocity combustion (D) 439
LAMINATES
Some new types of orthotropic plates laminated of orthotropic materials 280
LANGHAAR, H. L.
Axisymmetric flexural temperature stresses in circular plates (D) 575
Invariant membrane stress function for shells 178
LAZAN, B. J.
Damping constants and stress distribution in resonance response 201, 594
Origin of damping in high-strength ferromagnetic alloys (D) 574
LEE, E. H.
Elastic sphere under concentrated loads (D) 306
Large plastic deformations of beams under transverse impact (AC) 152
Plastic-flow in a V-notched bar pulled in tension (AC) 153
LEE, TI-CHIANG
On the stresses in a rotating disk of variable thickness (AC) 150
LEE, W. F. Z.
Free vibrations of constrained beams (AC) 310
LESSELLS, J. M.
British engine report (BR) 451
Writing the technical report (BR) 156
LEVIN, E.
On reinforced circular cutouts 546
LEVY, SAMUEL
Influence coefficients of tapered cantilever beams computed on SEAC . . . 131, 444
Skin friction and heat transfer for laminar boundary-layer flow with variable properties and variable free-stream velocity 415
LIN, T. H.
Simple method of determining plastic stresses and strains in rotating disks with nonuniform metal properties (D) . . 308
LIU, CHANG KENG
Stresses due to tangential and normal loads on an elastic solid with application to some contact stress problems . . . 157
LOW-TEMPERATURE RESEARCH
Superconductivity (BR) 596
